- The agency is otherwise exempt from the requirements of Section 2157.068 of the Texas Government Code.

The RFO method is a direct purchase or lease method used after the procuring entity's evaluation of written offers received in response to an open and competitive solicitation in accordance with the solicitation to result in best value. Under the RFO method, agencies must solicit, evaluate, select, negotiate as appropriate, and contract directly with one or more qualified vendors in accordance with the open and competitive solicitation.

To initiate an RFO, the agency must issue a written, open and competitive request for offers. In procuring under the RFO method, the procuring entity must also comply with the RFO guidelines published by SPD. If the agency believes that the procurement is proprietary, then the agency must follow the Proprietary Purchases procedures. The procuring entity's use of an RFO does not require or involve delegation of authority or prior approval by SPD. Procurements using the RFO method are subject to ESBD posting requirements as well as requirements applicable to CAT and QAT reviews. Additional requirements may apply to certain types of consulting services contracts.<sup>225</sup>

**Best Value Standard.** The term "best value" means the lowest overall cost of an automated information system.<sup>226</sup> In determining the lowest overall cost for a purchase or lease of an AIS, the agency shall consider factors including:

1. the purchase price;
2. the compatibility to facilitate the exchange of existing data;
3. the capacity for expanding and upgrading to more advanced levels of technology;
4. quantitative reliability factors;
5. the level of training required to bring persons using the system to a stated level of proficiency;
6. the technical support requirements for the maintenance of data across a network platform and the management of the network's hardware and software;
7. the compliance with applicable department statewide standards validated by criteria adopted by DIR rule; and
8. applicable factors listed in Sections 2155.074 and 2155.075 of the Texas Government Code.<sup>227</sup>

<sup>225</sup> See e.g., TEX. GOV'T CODE § 751.016 (specifying the reporting requirements applicable to contracts with a federal-level government relations consultant).

## Procurement Method – Professional Services

Agencies are authorized to procure professional services under Chapter 2254, Subchapter A, of the Texas Government Code.<sup>228</sup> Acquisition of professional services is delegated to agencies by statute and does not require a delegation of authority from SPD. The procurement of professional services is subject to ESBD posting requirements as well as requirements applicable to CAT reviews.

Professional services refer to services that are

1. within the scope of the practice, as defined by state law, of accounting, architecture, landscape architecture, land surveying, medicine, optometry, professional engineering, real estate appraising, or professional nursing;
2. provided in connection with the professional employment or practice of a person who is licensed or registered as one of the following: a certified public accountant, an architect, a landscape architect, a land surveyor, a physician, including a surgeon, an optometrist, a professional engineer, a state certified or state licensed real estate appraiser, or a registered nurse; or
3. provided by a person lawfully engaged in interior design, regardless of whether the person is registered as an interior designer under Chapter 1053 of the Occupations Code.<sup>229</sup>

Professional services procurements are usually advertised as either an RFQ or RFP. The award of a professional services contract is based on (1) demonstrated competence and qualifications to perform the services, and (2) a fair and reasonable price.<sup>230</sup> The professional fees under the contract may not exceed any maximum provided by law.<sup>231</sup>

To procure architectural, engineering, or land surveying services, the governmental entity<sup>232</sup> must first select the most highly qualified provider based on demonstrated competence and qualifications, and then attempt to negotiate a fair and reasonable price for the services.<sup>233</sup> If a satisfactory contract cannot be negotiated with the most highly qualified respondent, the agency must formally end negotiations with the respondent and then must attempt to negotiate a fair and reasonable price with the next most highly qualified respondent. This process may continue until a contract

is executed for the service solicited by the governmental entity.<sup>234</sup> Although the described process applies to the services of an architect, engineer or land surveyor, this selection process can be used for all professional services.

An agency shall provide written notice, on a prescribed form, to the LBB not later than the 10th day after the date the agency enters into a contract for professional services, other than a contract for physician or optometric services, if the amount of the contract, including an amendment, modification, renewal, or extension of the contract, exceeds \$14,000.<sup>235</sup> A contract entered into or an arrangement made in violation of Chapter 2254, Subchapter A, of the Texas Government Code is void as against public policy.<sup>236</sup>

**SAO Delegation of Authority for Audit Services.** Section 321.020 of the Texas Government Code specifies that a state agency or corporation that is dedicated to the benefit of a state agency may enter into a contract for audit services only if

1. the agency or corporation is authorized to contract with a private auditor through a delegation of authority from SAO;
2. the scope of the proposed audit has been submitted to SAO for review and comment; and
3. the services of the private auditor are procured through a competitive selection process in a manner allowed by law.

In addition, Article IX, Section 6.20 of the General Appropriations Act (86<sup>th</sup> Legislature), provides requirements for state agencies and institutions of higher education that use appropriated funds to contract for audit services.

## Procurement Method – Consulting Services

Agencies are authorized to procure consulting services pursuant to Chapter 2254, Subchapter B, of the Texas Government Code.<sup>237</sup> Acquisition of consulting services is delegated to agencies by statute and do not require a delegation of authority from SPD. The procurement of consulting services is subject to ESDB posting requirements as well as requirements applicable to CAT reviews. Additional requirements may apply to certain types of consulting services contracts.<sup>238</sup>

Consulting service refers to the service of studying or advising an agency under a contract that does not involve the traditional

relationship of employer and employee.<sup>239</sup> An agency<sup>240</sup> may contract with a consultant only if there is a substantial need for the consulting services and the agency cannot adequately perform the services with its own personnel or obtain the consulting services through a contract with a state governmental entity.<sup>241</sup> Consulting services procurements are usually advertised as an RFP.

If a contract involves both consulting and other services, the services will be procured as consulting services if the primary objective of the contract is the acquisition of consulting services.<sup>242</sup> Consider for instance a solicitation for an analysis of an agency's information systems needs and the development and implementation of a computer system. The primary objective of this contract is the delivery of a system and not the analysis provided. This contract is not a consulting services contract; therefore, the requirements for consulting services contracts would not apply. The agency, however, must comply with the applicable procurement method for acquiring AIS.

A "major consulting services contract" means a consulting services contract for which it is reasonably foreseeable that the value of the contract will exceed \$15,000 for a state agency or \$25,000 for an institution of higher education other than a public junior college.<sup>243</sup> A consulting services contract cannot be divided into more than one contract to avoid the procurement requirements pertaining to major consulting services contracts.<sup>244</sup> In selecting a consultant, the agency must base its choice on demonstrated competence, knowledge, qualifications, and on the reasonableness of the proposed fee for the services.<sup>245</sup> If other considerations are equal, the agency must give preference to a consultant whose principal place of business is located in the State or who will manage the consulting services contract wholly from an office in the State.<sup>246</sup>

# The Delegation of Authority to State Entities to Contract for External Audit Services

May 26, 2021

Members of the Legislative Audit Committee:

To provide you with more information regarding the amount of audit work being performed related to state government, the State Auditor's Office has compiled the following data on delegations of authority to contract for audit services. The State Auditor's Office is responsible for reviewing and approving state entities' delegation of authority requests in accordance with Texas Government Code, Section 321.020 (see text box). From September 1, 2019, through August 31, 2020, the State Auditor's Office received and approved 136 delegation of authority requests from 68 state entities.

Some delegations of authority covered more than one project. The 136 delegation of authority requests included 159 projects with an estimated total cost of approximately \$28.8 million, as reported by the state entities in their delegation of authority requests.

Auditors classified the projects into the following three categories:

**Financial audits:** Financial audits included (1) financial statement opinion audits for which the primary purpose was to provide an opinion on whether the auditee's financial statements were presented fairly, in all material aspects, in accordance with an applicable financial reporting framework and (2) financial-related audits that could entail various scopes of work.

**Internal audit services:** Contracted internal audit services were associated with state entities that did not have an internal audit department but were required to have an internal audit function under Texas Government Code, Section 2102.004 (see text box for more information about the requirement to have an internal audit function). In those instances, a state entity requested the authority to outsource the internal audit function. This category also included

## Delegation of Authority for Audit Services

Texas Government Code, Section 321.020, specifies that a state agency or a corporation that is dedicated to the benefit of a state agency may enter into a contract for audit services only if (1) the agency or corporation is authorized to contract with a private auditor through a delegation of authority from the State Auditor, (2) the scope of the proposed audit has been submitted to the State Auditor for review and comment, and (3) the services of the private auditor are procured through a competitive selection process in a manner allowed by law.

Additionally, Article IX, Section 6.20, of the General Appropriations Act (86th Legislature) provides requirements for state agencies and higher education institutions that use appropriated funds to contract for audit services, including a requirement to obtain a delegation of authority to enter into such a contract.

## Internal Audit Function

According to Texas Government Code, Section 2102.004(a), a state entity is required to have an internal audit function if it:

- Has an annual operating budget that exceeds \$10 million;
- Has more than 100 full-time equivalent employees as authorized by the General Appropriations Act; or
- Receives and processes more than \$10 million in cash in a fiscal year.

SAO Report No. 21-020

requests from state entities that had an internal audit department but may not have had the required resources or required expertise to perform a particular audit.

**Other services:** Other services included performance and compliance audits. They also included other engagements, such as attestation engagements (mostly client and auditor agreed-upon procedures engagements, as well as reviews of financial statement engagements).

Of the 159 projects included in the 136 delegation of authority requests reviewed, 65 (40.9 percent) were for financial audits, 51 (32.1 percent) were for other services, and 43 (27.0 percent) were for internal audit services.

In addition, 14 state entities accounted for 89 (56.0 percent) of the 159 requested projects. Table 1 lists those 14 state entities.

**Objectives, Scope, and Methodology**

The objectives of this project were to review state agencies' and higher education institutions' requests for delegated audit authority and to review documents and deliverables associated with audits for which audit authority has been delegated. The project scope included delegations of authority requests from September 1, 2019, through August 31, 2020. This project relied on state entities' self-reported information regarding requested services and estimated costs. That information was not subject to the tests and confirmations that would be performed in an audit. Auditors used professional judgment to determine the three categories in which to classify a project. The following members of the State Auditor's staff performed the project:

- Taylor L. Huff, CFE (Project Manager)
- Derek Lopez, MBA
- Ann E. Karnes, CPA (Quality Control Reviewer)
- Michael A. Simon, MBA, CGAP (Audit Manager)
