

Cybersecurity Resources

As cybersecurity threats continue to emerge and technology continues to evolve, the Department seeks to help credit unions protect their member's personal and financial data. We encourage credit unions to take advantage of the services available to you through trade associations, governmental entities, and private entities. Here are a few links that credit unions may find helpful in their effort to keep the institution and its member information safe and secure:

www.ffiec.gov/press/pr063015.htm – Federal Financial Institutions Examination Council (FFIEC) press release detailing its Cybersecurity Assessment Tool that may be used to help credit unions identify risks and assess their cybersecurity preparedness.

www.fsisac.com – Created by and for members, and operating as a member-owned nonprofit entity, the Financial Services Information Sharing and Analysis Center is the global financial industry's go to resource for cyber and physical threat intelligence analysis and sharing.

www.isaca.org – An independent, nonprofit, global association, ISACA (Information Systems Audit and Control Association) engages in the development, adoption, and use of globally accepted, industry-leading knowledge and practices for information systems.

www.staysafeonline.org – The mission of the National Cyber Security Alliance is to educate and therefore empower a digital society to use the Internet safely and securely at home, work, and school, protecting the technology individuals use, the networks they connect to, and shared digital interests.

www.nascus.org/Cyber17/index.php - NASCUS (National Association of State Credit Union Supervisors) sponsored a two-day Symposium on Cybersecurity. Information about the Symposium can be found on the NASCUS website.

[NCUA Cybersecurity Resources](#) - Resources available from the NCUA (National Credit Union Administration) to help credit unions identify and mitigate cyber risks.
